The **future** is our **present**

i n v i s i b l e dual-tech induction cooktop

Innovative concealed cooktop that transfers heat or wireless power

Porcelanosa Kitchens presents the latest new innovation in the SmartKitchen range: a breakthrough that is all set to revolutionize current notions of a kitchen, where countertops play such an important role. This is a key area of kitchens, where dishes are dreamt up and prepared and finishing touches are added to them. It is also one of their main interconnecting points.

It is in this area of the kitchen—the countertop—that SmartKitchen is proud to showcase its latest new development: a solution that is here to stay, facilitating many aspects of our day-to-day life:

An invisible new SmartKitchen induction system, fitted under the countertop and equipped with dual technology. This ensures a larger, obstacle-free, hygienic workspace, with just a small embedded touch-sensitive screen to control the different electronic features.

Thanks to this concealed dual system, the countertop can be used as a cooktop or to power small kitchen appliances wirelessly through proximity with the countertop. This is an eco-friendlier system since it reduces the dependence on batteries and the inconvenience of cables.

In addition to the added ease of just having to clean one single, seamless surface, SmartKitchen cooktops also enhance the whole kitchen visually, freeing up workspace and bringing cutting-edge technology to the kitchen.

GAMADecor

1. Dual cooktop, transfers heat or wireless power.

2. Invisible system.

3. Safer cooking—the surface does not overheat.

4. Cordless technology—no wires or batteries are needed.

5. Optimisation of space for cooking or working on.

6. Highly energy efficient.

7. Easy to install.

8. Can be integrated in any Xtone worktop*.

9. High scratch and impact resistance.

** In the place where it is fitted, the worktop must be a max. of 12 mm thick.*
