Ner Series

The collection that will give a new style to your bathroom, a clean and minimalist image

MORE SUSTAINABLE AND RESPONSIBLE BATHROOMS

KRION SHELL®

Worktops

Collection 2024

Personalise your bathroom. Adapt it to your style.
Make it a bespoke place, a place of its own.

We spend an average of two years in the bathroom in our lifetime. Don't let it become a place to pass through, homogenous and lifeless. Although it is true that bathrooms are the most functional room in the house, this does not necessarily mean that it should be monotonous.

Personalising interiors means adapting a person's lifestyle, way of relating to others and their tastes and needs to the different elements that make up their home.

From the layout of the space, the choice of materials, the colours of the wall, floors and furniture; everything can be personalised. Interior design can be a clear reflection of our identity and, at the same time, it can provoke endless emotions.

For all these reasons, Krion Porcelanosa Baths has developed a multitude of bathroom elements in different formats, textures and colours that can be combined with each other, allowing the bathroom to be completely customisable according to your needs.

KRIFON[®] SOLID

Natural style, pleasant to the touch, hard-wearing, among its main characteristics

Krion® Solid is mainly composed of high purity white mineral (ATH). This gives the material its hardness, strength and a unique feel.

The Krion® Solid bathroom series are entirely made with the Krion® Solid solid surface, which makes it possible to achieve monolithic pieces, from elements with straight and symmetrical lines to designs with curved and oval shapes, always maintaining a uniform aesthetic that offers excellent visual continuity.

Thanks to the pure white of Krion® Solid, bathrooms with a natural style and silky touch are achieved, in addition to multiple technical benefits, such as resistance and uniformity. Each series is distinguished by its own character, always maintaining the essence of design and exclusivity.

From the hands of Krion PORCELANOSA Grupo and Fran Silvestre, the NER collection is born.

Manufactured with Krion® Solid material, NER countertops and washbasins, with their characteristic white, offer resistance, uniformity and stand out for their clear, polyhedral shapes. Its straight lines reveal a washbasin with a fine opening that runs along the entire basin, through which water drains easily thanks to the slope of the basin base. The technical part of the washbasin, such as the drain with a direct connection to the siphon, is hidden from view, offering a clean image.

Smart, by Krion® Solid, the series that stands out for its simplicity. The oval recessed washbasin, with one or two basins, has an integrated overflow. It can be installed independently or accompanied by a wall-hung unit with large pull-out drawers (single or double), and finishes in taupe oak, ash oak, deep blue, white and beige.

The Smart series also includes, as an option, a metal chassis with a shelf.

It is designed for quick installation and easy maintenance.

Nest features softly rounded lines, inspired by asymmetrical shapes with an exquisite presence where the design, like water, flows smoothly and naturally.

This careful design with the absence of corners makes maintenance and cleaning easy and quick, prolonging its durability. It has a practically imperceptible perimeter ridge that favours hygiene and prevents water overflowing and splashing on the floor. The Nest worktop has an integrated high-capacity overflow for rapid water drainage.

NEST SERIES

KRION **SOLID**

Black and white finishes

The series is made up of various elements and materials that are mixed together to offer a wide range of options: worktops, furniture, metal chassis and accessories, with Krion® Solid finishes on the worktops and black or white lacquered finishes on the rest of the elements.

KRION SHELL

Krion Shell® is an *Engine Mineral Composite* developed internally by Krion PORCELANOSA Grupo. It is composed of two parts: a solid and homogeneous outer layer composed of minerals (ATH) and resin; and a primary body formed mainly by minerals (dolomites) and an Eco Resin, composed of recycled PET, which amalgamates it creating the internal structure.

Krion Shell® uses a moulding process, *Surface In-Mold Connection*, where the outer layer (ATH + resin) and the structural body (Eco Resin + dolomites) are joined together, creating a bond between them, giving the material, high strength and high definition finishes.

Uses at least 5% of plastic waste in its total composition

SCS Global Service, an independent North American leader in environmental certification, verifies and guarantees that all certified Krion Shell® products contain a minimum of 5% plastic waste of their total weight in their total composition, thus making their production more sustainable and respectful of the environment.

Natural 12 cm

With a thickness of 12 cm, this model of the Natural countertop offers 2 options, a continuous skirt that maintains the uniformity of the rock texture throughout its front, or the incorporation of a towel rack by opening a hole in the skirt, providing extra space in the bathroom.
